

Intelligent Buildings International -
Special issue on ***Intelligent Pervasive Spaces for Working and Living***

Dear colleagues,

We are the Guest Editors for a special issue of the journal of *Intelligent Buildings International* and we would like to invite you to submit your papers.

The theme of this special issue will be Intelligent Spaces for Working and Living. Intelligent spaces include offices, homes, hospitals, buildings and other built environments where information and communication technology (ICT) is used to enhance the interaction between people and buildings. This leads to improvements in the quality of work and life, and also aims to provide better building performance and environmental sustainability. The special issue will cover both theoretical approaches and practical examples. A wide variety of topics are suitable, such as semiotic theories and techniques, requirements engineering for multiple stakeholders, personalisation in intelligent buildings, pervasive informatics, smart technologies and their impact, and virtual and distributed environments. Articles can be submitted in the form of research papers, cases study articles, technical notes and reviews.

If you would like to contribute to this special issue, please first send us an abstract for initial review and feedback. We will be happy to offer advice on the suitability of the articles in terms of scope or style.

If you wish to see past papers from the journal, please visit the journal website: www.earthscan.co.uk/journals/inbi for a link to the free online version of issue 1.1, as well as submission guidelines for preparing the final submission.

Important dates:

30/5: A detailed one-page abstract submission to the editors for informal consultation (please send it to Stuart Moran at stuart.moran@reading.ac.uk)

15/6: Feedback to contributors on the abstract

15/8: Full paper submission (journals@earthscan.co.uk)

16/8: Papers sent out for peer review

15/9: Decision on full papers

Full submissions should be sent to journals@earthscan.co.uk, as advised on the journal website. The author of each full submission can state 3 reviewers from which one will be chosen; plus one assigned by the editor.

If you would like to seek any further advice, you can email us directly at k.liu@reading.ac.uk, or r.yao@reading.ac.uk and we'll try our best to help.

Kind regards,
