

THE MANUAL OF

EUROPEAN ENVIRONMENTAL POLICY

- The most systematic, reliable and comprehensive source on EU environmental policy
- Analysis of over 500 Directives, Decisions and Regulations
- Regularly updated by an interdisciplinary team of experts
- A vital companion for all those who need to keep pace with policy developments in Europe
- The leading online interactive guide to EU environmental policy
- Directly links to relevant EU legislation and communications

CONTENTS AND COVERAGE

A quick guide to current policy and future developments

This contains useful information to provide a quick guide to current and future EU environmental policy developments. Chapters include:

- A reference guide to EU environmental legislation
- A description of proposed legislation waiting to be adopted

- A review of anticipated future actions in the field of EU environmental policy
- A searchable list of key updates and new articles written

Part A: The framework for EU environmental policy

This contains an introduction to the EU's approach to environmental policy over the last four decades as well as the key institutions and processes which are used to shape it.

Chapters include:

- An introduction to EU environmental policy
- The history of EU environmental policy

- Environment in the EU treaties
- EU Institutions and how they operate
- Principles in EU environmental policy
- EU policy instruments

Part B: Environmental policy by theme

This sets out over 500 Directives, Decisions and Regulations as well as other policy instruments that make up EU environmental policy. For each legislative instrument the following information is included: their coverage; history; implementation; key infringements;

and anticipated developments.

Chapters cover:

- Air quality
- Climate change
- Environmental regulation of industry
- Water and marine

- Waste policy
- Resource use and product policy
- Chemicals and hazardous substances
- Biodiversity
- Noise

Part C: Horizontal measures and funding

This sets out the many horizontal policy measures which support environmental policy making in the EU. It covers both policy tools relating to information exchange and assessment as well as funding instruments which can be used to pursue environmental policy objectives. Chapters include:

- Environmental impact assessment
- Strategic impact assessment
- Environmental crime
- Public participation
- Freedom of information
- Environmental liability
- Information on the state of the environment (CORINE)

- Access to Community institutions and bodies
- European Environment Agency and other supporting agencies
- Structural funds
- Cohesion funds
- LIFE +
- Intelligent energy Europe
- Rural development

Part D: Environmental policy and other policy fields

This discusses how environmental policy relates to other areas of EU policy. Chapters cover the following areas:

- Agriculture
- Land management and degradation
- Marine affairs and fisheries
- Energy

- Transport
- Trade
- International development
- Regional policy

Areas of legislation covered in the Manual include

Air quality

- Air quality framework Directive
- National emission ceilings
- Emissions associated with liquid fuels and transport
- Emissions from vehicles
- Volatile organic compounds from petrol
- Quality of petrol and diesel
- Sulphur content of certain liquid fuels
- Lead in petrol
- Emissions and noise from pleasure boats

Climate change

- Effort sharing to reduce greenhouse gas emissions
- EU Emissions Trading Scheme
- Monitoring and limiting greenhouse gases
- CO₂ from passenger cars
- Energy taxation
- Fluorinated greenhouse gas emissions
- Electricity from renewable sources
- Biofuels for transport
- Combined heat and power
- Use of carbon capture and storage
- Energy end use efficiency and energy services
- Energy performance of buildings
- Energy labelling
- Ozone layer
- Adapting to climate change

Environmental regulation of industry

- Integrated pollution prevention and control
- Major accident hazards
- Large combustion plant
- Waste incineration
- Titanium dioxide
- Volatile organic compounds from industry
- EMAS

Water and marine

- Water framework Directive
- Marine strategy framework Directive
- Groundwater protection
- Quality standards for water
- Urban waste water treatment
- Nitrates
- Detergents
- Bathing water
- Drinking water
- Flooding
- Water scarcity
- Oil pollution at sea
- Dangerous substances
- Shellfish waters
- Fishlife
- EU water initiative

Waste policy

- Waste framework Directive
- Shipment of waste
- Hazardous waste
- Landfill
- Waste statistics
- Waste from extractive industries
- Ship generated waste
- Waste oils
- Sewage sludge
- Disposal of PCBs

Resource use and product policy

- Integrated product policy
- Sustainable consumption and production
- Ecolabelling
- Energy using products
- Packaging
- Batteries and accumulators
- End of life vehicles
- Waste electrical and electronic equipment (WEEE)
- Hazardous substances in electrical and electronic equipment (ROHS)

Chemicals and hazardous substances

- Registration, evaluation and authorisation of chemicals (REACH)
- Testing new chemicals
- Dangerous preparations
- Restrictions on marketing and use
- Export of chemicals
- Screening for lead
- Testing existing chemicals
- Transport of dangerous goods
- Asbestos
- Biocides: authorisation and marketing
- Pesticides: restrictions on marketing and use
- Pesticide residues
- Pesticides: authorisation and marketing
- Radioactivity
- Safety standards for radiation
- Shipment of radioactive substances and waste
- Emergency food protection

Biodiversity

- Birds and their habitats
- Habitats and species conservation
- Trade in endangered species
- Environmentally sensitive farming
- Forests
- Environmentally sensitive fishing
- Contained use
- Deliberate use
- Food and feed
- Traceability and labelling
- Transboundary movements

Noise

- Assessment and management of noise
- Vehicles
- Aircraft
- Outdoor equipment
- Noise in the workplace
- Household appliances

THE MANUAL OF EUROPEAN ENVIRONMENTAL POLICY

An understanding of EU environmental law and its effects is essential for individuals and organisations concerned with environmental policy, either at the national or international level. However, as the body of EU legislation grows, and the nature of environmental policy evolves, it is getting increasingly difficult to keep up with the developments and their implications. Hence the need for a reliable and systematic Manual, updated regularly and combining a guide to individual measures with the necessary background and context.

2010 sees the relaunch of the Manual of European Environmental Policy which is an essential guide for all who need to keep pace with EU environmental policy. Published since 1992, the Manual has been

restructured and refocused to give it a truly pan-European perspective. In addition, it will be available in a new online format with enhanced search and purchase options as well as continuing in print form.

"...perhaps the single most complete and insightful one-volume book on European Union environmental legislation... should be on the bookshelf of every environmental professional"
Don C Smith, Editor-in-Chief,
Utilities Policy: Strategy, Performance, Regulation

The Manual is the most systematic, complete and dependable source of information on EU environmental policy and legislation. The chapters include an introduction to European institutions, policy processes and instruments used in environmental policy making; information on over 500 Directives, Decisions and Regulations; an analysis of the relationship between environmental policy and other EU policy fields; and a summary of forthcoming policy measures as well as a comprehensive reference guide to environmental legislation.

The Institute for European Environmental Policy (IEEP)

The Institute for European Environmental Policy is a leading centre for the analysis and development of environmental and related policies in Europe. An independent, not for

profit organisation, IEEP offers guidance and forward looking solutions in a complex legislative environment, based on its unrivalled knowledge of European policy developed over thirty years.

For further information on IEEP, go to www.ieep.eu

Editors

Dr Andrew Farmer is Senior Fellow at the Institute for European Environmental Policy and Head of the Industry, Waste and Water Programme. He has undertaken extensive research on implementation and enforcement of EU environmental policy especially in the field of water and pollution control.

Dr Marc Pallemaerts is a Senior Fellow at the Institute for European Environmental Policy and Head of the Environmental Governance Programme. He is also Professor of European Environmental Law at the University of Amsterdam and has served as a senior legal and policy advisor to several environmental and energy ministers in Belgium as well as acted as a lead climate negotiator.

These editors are supported by an editorial board who oversee the direction and priorities of the Manual. This board is chaired by Nigel Haigh, founding editor of the Manual. Nigel is a leading authority on the development and application of EU environmental policy and has been on the board of the European Environment Agency as well as the Environment Agency of England and Wales.

SUBSCRIPTION OPTIONS

Online features

From 2010, Earthscan will be publishing the Manual of European Environmental Policy in a completely new online format. A subscription to the online Manual will enable you to:

- Receive timely updates on policy developments
- Link directly with relevant legal texts, policy proposals and cases of the European Court of Justice
- Subscribe using flexible subscription options. You can now subscribe to the sectoral chapters that interest you, and add on additional chapters
- Use advanced search functions
- Cross reference key terms
- Access archived versions of environmental policy analysis since 1992
- Bookmark and share using social networking sites like delicious, FURL, CiteULike, Bibsonomy

Who should subscribe

- Academic and research libraries with environment, law and politics departments
- National and local government departments, agencies and legislatures world-wide
- International government agencies
- Non-governmental organisations
- EU and international businesses affected by any of the areas of the legislation covered
- Law firms and consultancies handling environmental, EU and international matters

Why subscribe

- The Manual provides systematic, comprehensive and reliable information on all areas of EU environmental policy
- It will keep you up to date on all recent and forthcoming policy developments
- It enables a fuller understanding of the interconnectivity of EU environmental policy and its international relevance
- The Manual is an essential information tool for all those working in, studying, or researching the policy field

Still available in print

The Manual will also be available to purchase separately in print. The print edition, published at the end of each year, will include all the updates published for that year.

Pricing

Subscription package options are available on our website. Prices are based on the size and nature of your institution or organisation. Special prices are available for NGOs, small organisations, and current subscribers.

For information on pricing and ordering,
Go to: www.earthscan.co.uk/journals/meep
Email journals@earthscan.co.uk
Phone +44 (0)2078411930

The Manual of European Environmental Policy will be available from June 2010. Existing subscribers to The Manual of Environmental Policy: The EU and Britain will still be able to receive access to that version through Maney until June 2010.

Sign up to receive information on developments and news of the Manual, by emailing journals@earthscan.co.uk with 'MEEP Updates' in the subject box.
